GITFLOW

¿QUÉ ES?

GitFlow es un **modelo de branching**, que propone una **estrategia de ramificación y generación de versiones** de productos usando **un repositorio Git**

HISTORIA

About me

Who's behind this blog?

My name is Vincent Driessen and I'm a software engineer mainly interested in web development and programming tools and technologies. Some of my interests include modern JavaScript, Node, Elm, Python, Vim, and Git. This is my personal blog where I share my thought and ideas.

My usual nickname is **nvie**, hence the name of this blog.

A successful Git branching model

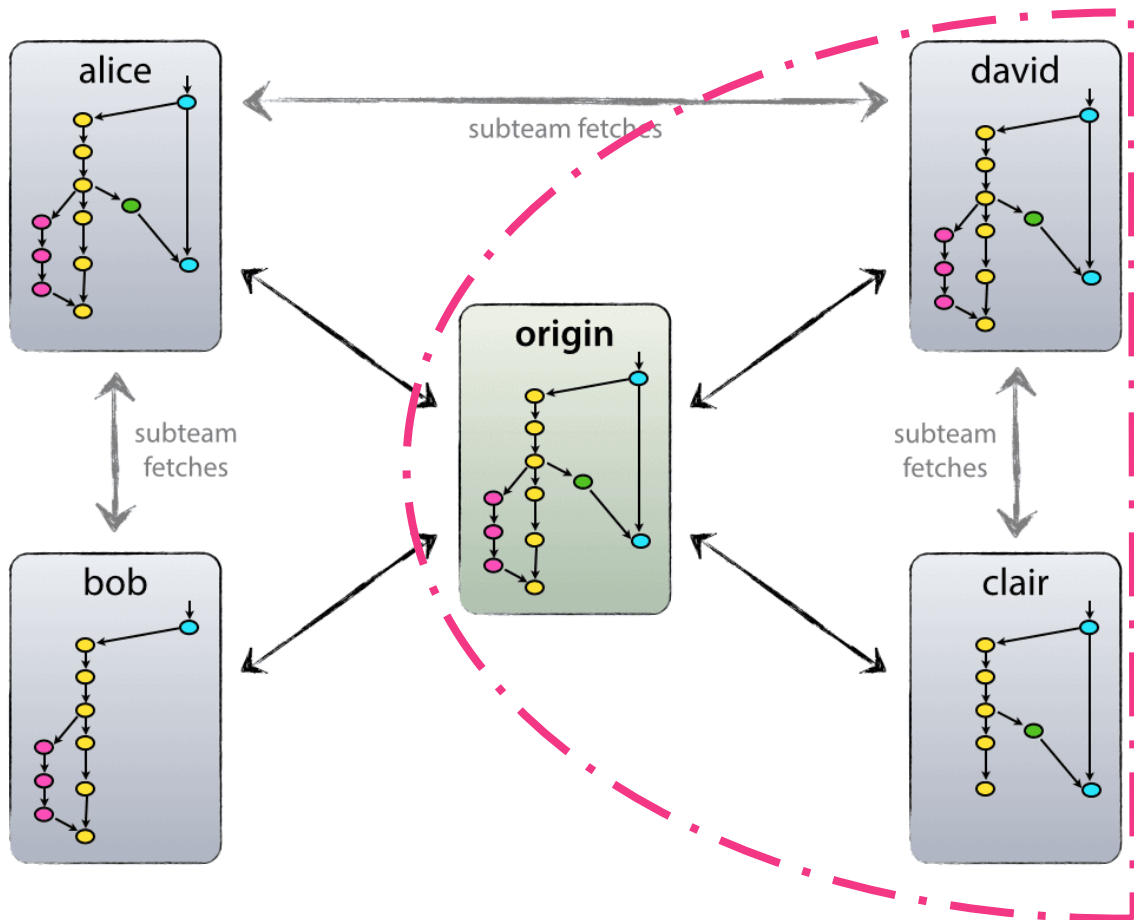

By [Vincent Driessen](#)

on Tuesday, January 05, 2010

In this post I present the development model that I've introduced for some of my projects (both at work and private) about a year ago, and which has turned out to be very successful. I've been meaning to write about it for a while now, but I've never really found the time to do so thoroughly, until now. I won't talk about any of the projects' details, merely about the branching strategy and release management.

DESCENTRALIZADO PERO CENTRALIZADO
